

Miller ArcReach SuitCase 12

The Miller ArcReach voltage sensing portable wire feeder works with any power source, and operates entirely on arc voltage – welding supply cable meaning no costly control cables to purchase or maintain. Superior performance is achieved when used with any CC, CV, Multiple Operator Grid or DC engine-driven power source.

FEATURES:

- Polypropylene case with built-in slide rails and the ability to open the door to change wire with the feeder in a vertical position.
- Digital meters with SunVision technology are standard for amperage and wire speed. Meters can be seen clearly even in direct sunlight.
- Trigger hold, wire jog, and gas purge are all standard and located inside the feeder.
- Wider voltage range for small and large wires with no contactor chatter or arc outages.
- Excellent starts and superior arc performance for all types and sizes of wires whether using CV or Cc power supply. Has built-in soft start control.
- **If combined with the ArcReach power source you can adjust the voltage and amperage at the wire feeder.**

ORDERING INFORMATION:

ArcReach 12.....Supports 10lb and 30 lb spools
280259 Sensing Cable
252262Trigger Cable Assembly
AEC-3-041-TWPower Cable Assembly
132960 5/64” Drive Rolls
