

## PROFAX AIR CARBON ARC Gouging Torch

PROFAX Air Carbon Arc Gouging Torch are specifically designed for safe and highly efficient removal of manganese metal from track components.

### FEATURES:

- Deeper Gouge
- Cleaner Groove
- Less slag removal
- Faster, cooler metal removal on manganese steel
- Concentrated air where it counts
- Repairable air valve
- Long encapsulated boot, protects the power and air connections from exposure to sparks and molten metal, as well as electrical shorting of the back through the signal network
- High quality copper wire rope and double wall thickness cover designed to take the normal abuse in the railroad industry
- 360 degree swivel head for safe operation, prevents cable twisting
- Lower overall costs of metal removal
